

## NEW IMPROVED Triple-Strength

Olefin fibers and berbers are frequently difficult to clean because of their tenacious affinity for oils.

From the lubricant and metal forming industry, Bane-Clene® introduces an answer to this problem.

OLEFIN PRE-CONDITIONER is a super-concentrated formulation of uniquely balanced surfactants specifically formulated to emulsify and break down heavily compacted oil and grease, especially in carpet traffic lanes and other hard to clean areas.

**NOTE:** Extended contact time and agitation may be needed in severe cases.

**NET CONTENTS:** 1 gallon  
**FOR PROFESSIONAL USE ONLY**

# OLEFIN

## Pre- conditioner Prespray Traffic Lane Spotter

### DIRECTIONS FOR USE

1. Test all fabrics for colorfastness.
2. **Heavy oily soils on olefin:**  
Mix 10 parts of water to 1 part product in a pressure sprayer, preferably stainless steel. If using an injection sprayer preset at 1:10, add to the injection sprayer jug undiluted. Allow at least 15 minutes before cleaning. If extremely soiled loop-pile, agitate the carpet with a deck brush or with a low-speed buffer and soft carpet brush.
3. **Light to moderate soil:** Use at 1:30 with water.
4. Apply the diluted mixture to the fabric or carpet. Allow at least 15 minutes before cleaning.

### CAUTIONS:

1. Do not apply to materials that require dry cleaning.
2. Always test fabric or carpet before using.
3. Do not allow to dry on the surface before extracting.
4. Always follow with extraction.
